SITUATION SUMMARY

Strong Petroleum Odor/Sheen, Summerland, Santa Barbara County, SPILL 15-4883

On 08/20/15 at 1259 hours, Santa Barbara County Environmental Health advised of a strong petroleum odor and sheen at Summerland Beach located near Lookout Point. The beach extends eastward towards Loon Point. Source of release was unknown and samples were collected to be analyzed.

On 08/21/15, Cal OES advised Santa Barbara County Public Health Department issued Press Releases for the Closure and Warning for Summerland Beach.

- Summerland Beach is closed to the public to prevent adverse health effects and protect the public's health. The decision to close the beach at this time was due to the volume of oil on the beach and sand, the nature of the oil (more liquid and mixed in the water and across sand as opposed to solid tar balls which are more easily avoidable) and intermittent strong petroleum odors at a level that may cause health effects.
- Summerland Beach will continue to be monitored by various County agencies including Public Health, Parks, and Air Pollution Control District. Monitoring of air, land and ocean conditions will continue.
- The cause of the oily substance at Summerland Beach is not yet clear.
- This is not believed to be directly related to the Refugio 901 incident.
- Further testing and analysis will continue over the next few weeks. In the interim, we strongly advise the public to be observant of conditions at the beach and avoid close proximity to the beach when there is a strong odor and/or large amounts of an oily substance present.

There are no requests for assistance or unmet needs.

The California State Warning Center conducted all appropriate notifications, including but not limited to local government agencies.

Cal OES Duty Officers are monitoring the situation and will provide updates as they become available.

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA

A weak trough will linger over the region today, then high pressure will return for the weekend. A stronger trough will be sliding south along the British Columbia coast over the weekend, and early next week a large trough will linger offshore. A few clouds may show up over the northwest mountains Sunday and Monday; otherwise, the weather ought to be mostly sunny and seasonably warm. The marine layer will remain fairly deep again today, then likely become somewhat shallower over the weekend. Winds will remain quite light overall into the weekend, but they will also become more southerly starting Saturday and gradually gain some strength through early next week. Afternoon maximum temperatures will be in the mid and upper 90s for the warmer, sunnier inland valleys. Smoke near ongoing fires may dissipate comparatively well again today, then not so much Saturday and Sunday. Areas near and downwind of the fires will continue to have poor air quality issues.

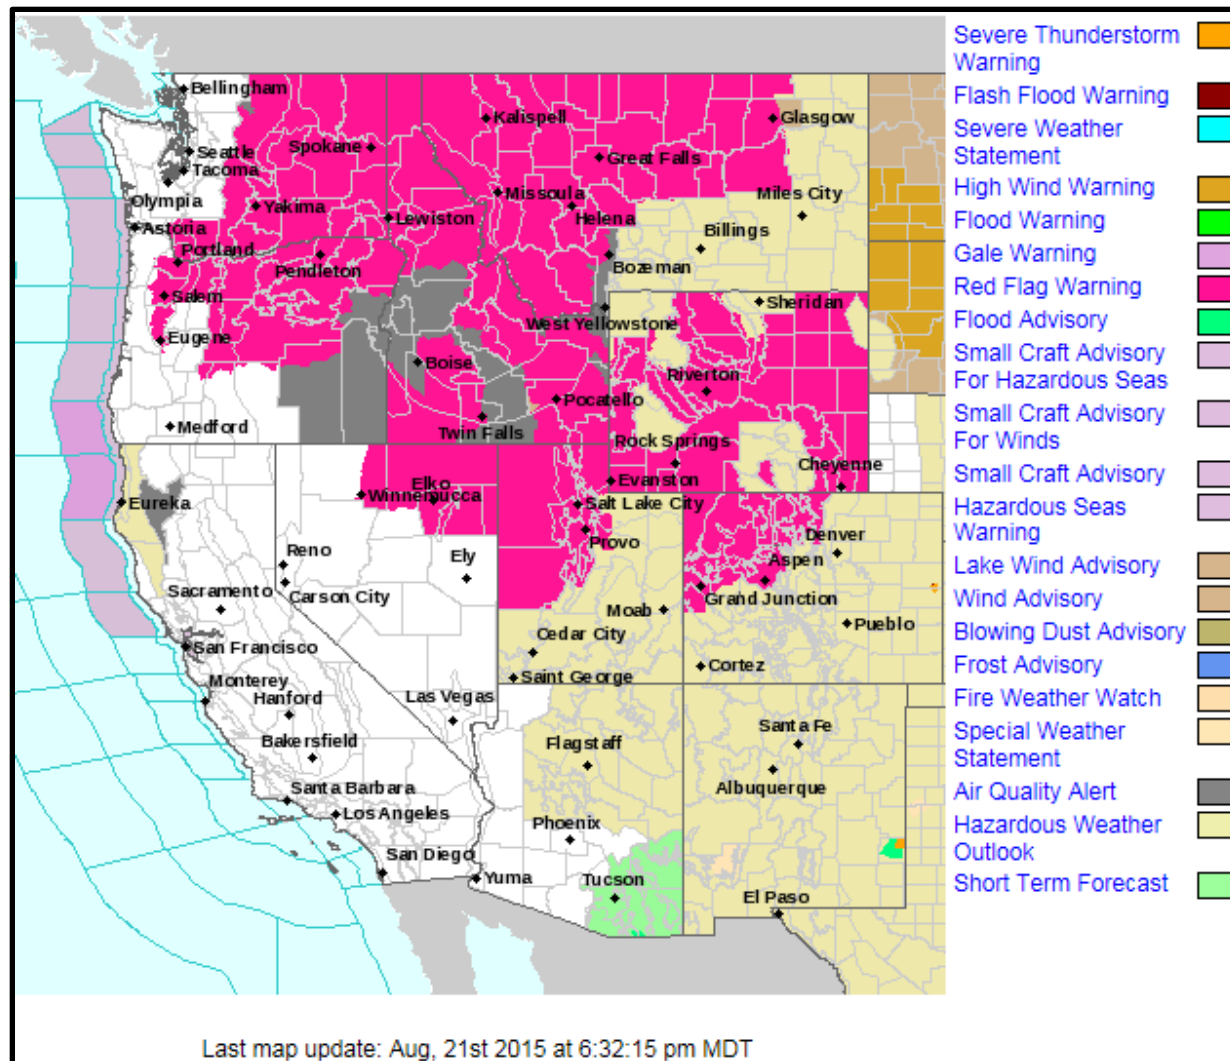

SOUTHERN CALIFORNIA:

A trough over the Pacific Northwest will continue to bring westerly winds of 15 to 25 mph with gusts to 40 mph to the desert passes through this evening. Temperatures will remain a little below normal today, with mid 70s to mid 80s across the mountains and mid 80s to mid 90s in the valleys. The marine layer is between 2,500 and 3,000 feet deep this morning with low clouds and fog over the lower coastal mountain slopes. High pressure over the desert southwest will strengthen bringing a gradual warming trend to the region Saturday through the end of next week. Minimum relative humidity will be mainly in the teens above and inland from the marine layer through the end of next week. The deep marine layer will shrink starting Sunday with morning low clouds and fog only moving over the coastal areas by Monday. Southerly flow aloft may bring isolated afternoon showers and thunderstorms to the Sierra and to the mountains and deserts of Southern California east of the Cajon Pass Tuesday.

FIRES, SOUTHERN OPERATIONS AREA

Rough, Vegetation Fire, Fresno County

Location: 5 miles north of Hume Lake and 2.5 miles southwest of Spanish Mountain

Jurisdiction: FRA

Start Time: 07/31/15 at 1933 hours

Per Cal OES, CAL FIRE, and ICS-209 as of 08/21/15 at [1749 hours](#):

- [41,984 Acres](#), 3% Contained

Evacuations/Shelters:

- Mandatory Evacuation Areas:
 - The Hume Lake Christian Conference was evacuated 08/18/15. Per the Cal OES Law Duty Officer (LDO) evacuation was accomplished in less than 2 ½ hours due in significant part to prior planning between Fresno Sheriff and the Camp Staff. The group of 750 to 1000 people were evacuated to a sister Church in Fresno for sheltering.
 - There are 250 mandatory evacuations in the National Park Campgrounds in the immediate area of Hume Lake Christian Camp.
 - There has been an evacuation of 32 private residences, believed to be all vacation homes in the Big Meadow and Heart Meadow Neighborhood.
 - Approximately 1,500 campers in several Kings Canyon National Park Campgrounds located along 10 Mile Rd have been placed under mandatory evacuation.
- EOC Activations: [Fresno County EOC is activated at Level 2 from 0700-1900 hours](#)
- The California Highway Patrol has also moved the road closure, which had been located at the intersection of Highway 180 and Hume Lake Road. The new road closure now sits further south on Highway 180 at Grant Grove Tree (approximately 2 miles north of the Hwy. 180 and Hwy. 198 interchange). The roadway will remain closed until authorities determine it is safe to reopen. The Sheriff's Office wants to make the public aware that no one will be allowed to enter the Hume Lake area; people will only be allowed to exit.
- Per CUEA, PG&E critical facilities and distribution assets are no longer in a high risk category for threats to power serving Central California. CAISO has reviewed PG&E facility locations that may be impacted by the fire and none of the locations would compromise the grid in any capacity. There would be no brownouts if these sites were impacted.
